

I'm not robot!

should perfect the flame on your pap mark/meister earrings before xposing to SW. Because of this, you'll want to purchase a 16* papulusat monoole and a 16* meister earring to your sweettooth earring. This effectively lets you get the 15->16* bonus twice which is really nice to get bonus stats. (even though pap mark is rare af)

Inner Ability [1029] Inner ability is yet another RNG based game mechanic, you unlock one line at lv30, one at lv50 and the last at lv70. Best way to go about getting it to legendary potential is saving up about 100k honour exp you get from grinding, using 100 xp honour rerolls to get to unique tier, then using circulators from the cash shop to get a legendary tier IA. To get 3 lines of potential you want, most people I know used circulators to roll a desirable first line, which is usually, Att Speed +1, Boss Damage +20% or Buff Duration +50%. Circulators will always give the best line, for example if I try to roll for a +30 attack line using honour, I may only get +27 or +25 attack whereas any attack line I roll using circulators will always be +30. To obtain desirable 2nd/3rd lines, lock the first line , and reroll your second/third lines using honour exp. It's best to wait for the half price honour rerolls before doing these to maximise the number of rolls you'll obtain. Another way to do it, is to roll a unique second/third line using circulators, to ensure you get a decent 2nd line, and then roll your first line using honour xp. This is because your second and third lines can be rare/epic/unique tier, however your first line is always guaranteed to be legendary so you can guarantee a good second line and then use honour exp to get a decent first line, even if it isn't perfect. BIS IA's differ between each class, so google/reddit search what's most optimal for yours. Nox(Sam) is a legend so use this: Bosses [1030] There is a very helpful post by /u/Ekanseltar, it's linked in the Credit section but I'm going to add little bits of information from my own experience for the bosses I've done Zakum- Recommend level 100/4th job just to do it, notes for the fight can be found in "Training guide" section. Doesn't really require much mechanics/range, just dodge the hands and you'll be fine Chaos Zakum- Requires CRA level damage to kill it, If you can solo, you should be running this weekly to get transfer hammer material for your absolab cape. Hilla-30k Minimum, 200-300k to kill quickly Hard Hilla - 3-4m to solo if your class has good burst, most if not all classes should be able to easily 1-bind at 5m range. Easy Magnus - be level 180ish to make it easy or have decent gear. Around 200k range it becomes pretty easy, prior to that it takes a while to kill but isn't particularly hard mechanics wise. Normal Magnus - Depends on how good you are at dodging meteors/push attacks. At around 1.5m range I could kill him within a bind solo, but that's not really necessary as you can actually fight him at much lower starting at around 500-600k but be prepared to dodge a lot of shit and actually have to deal with mechanics. Hard Magnus - Heavily varies based on skill and class. To be in a raid party, 1.5m range with 85% IED, to solo around 4m range to be able to burst hell phase in a bind. Again that number varies heavily based on class, I know that Thief classes with access to Shadow Walker may be able to do it earlier because they can attack freely and ignore meteors/gas. I can comfortably solo within about a minute at ~5m range 199% boss and 92% IED (unless I die), I'd recommend checking out this guide: Easy HT- As soon as you unlock it, should be easy, just make sure not to get ohko'd by the tail hit on the right side on the ground. Normal HT- 100k range for a comfortable solo, be very careful of tail hit as it does 16k damage, which is enough to OHKO most classes at that level range. Stance is very important here, getting knocked off the platforms constantly is very annoying Chaos HT - Recommend 600k, although it can pushed lower if you're patient and have good reactions to seduce+1/1 and if you get seduced while Hero's Will is down, well unlucky. Easy Gollux- If you can kill the abdomen, you can kill him it's really easy. Should be doable as soon as you've finished the prequests. Normal Gollux - if you can kill Normal Horntail, you can probably do this as well. If you're not comfortable get 200k range and try again Hardlux- 400-500k for first timers Hellux- Recommended is 3-4m to solo but again varies based on class. If you're not sure, just try it if you have 5th job. I had 1.9m clean as an NL and I can clear it in about 7 minutes and with 60-70% time left on the timer, however this is because Dark Flare clears the mobs at the bottom and I have insane burst from Shadow Walker/Last Resort/Spread Throw. I had a friend with 1.6m clean who is an AB, and he had trouble clearing it with another AB because they couldn't gem in time, so it's pretty class dependent. CQueen- If you can kill Hellux you can probably do CQueen. It's not too difficult once you learn her mechanics, just make sure to turn down the autopot threshold so you dont get autopot lag while you're on fire and make sure to Hero's Will the zombify effect, otherwise you'll die while you're on fire and you try to heal using pots. For more in-depth check out this guide: CPierre - Very annoying if you can't burst within one bind to avoid the split phase. I did it with about ~2.5-3m range but had to wait for the right hat phase. For details on mechanics: For me this was actually the easiest because it's kind of hard to die if you have autopot. CVonBon- Must say, in my experience this was the most difficult. With the other 2 it's kind of easy to survive once you get the hang of it but CVB always found a way to fuck me over. Pretty much everything in this boss will oneshot you (his jump, his sperm ball, his meteors). For me I like to dps normally until I hit his last phase, then bind + burst to finish him because trying to hit him while he's not on the map in the last phase makes the clear difficult. Also try to avoid jumping too much otherwise you'll die if you land just as he pounds the ground. More details here: Chaos Vellum: The big snake. It's really just getting used to the timing of the tails and falling rocks and timing your binds + burst correctly. I first did this at 5m range, although I'm 100% sure it's possible at lower ranges but you ABSOLUTELY MUST HAVE SUFFICIENT IED. My damage to Cvell tripled after dmt, not because I got more range but because I finally made the jump from 88->93% IED. Things to watch out for: don't be greedy for dps during the poison stage, focus on watching the ground for his tails because they're difficult to see under the green shit all over the ground, and don't be greedy for dps in general. It's better to dodge a tail than to hit 1 more rotation of spells. Lotus: Damage requirement to be in a party is to be able to solo Cvell in 10 minutes. Honestly, damage required to solo isn't that high but usually it's difficult for people to get used to the mechanics and not die during phase 1 which leaves you less wiggle room in p3 for the buggy purple orbs. In GMS, can be difficult to solo clear especially after the removal of -2 sec status neb but is definitely still doable without godly gear. P1 can be buggy as hell, so dont feel bad if you fail a run here and there (teleporting lazars, portals not working, lasers speeding up forever). Don't be an ass and ronaldo the platforms because you'll fuck everyone in your party over if its not available to dodge electric ground. Damien: Similar to Cvell in the idea that your dps windows are fairly limited, and it's hard to keep track of where the boss is. Damage requirement is similar to lotus as well. Avoid dying with full stacks otherwise the run becomes hell when multiple swords spawn. Make sure you have good communication with party members - in phase 2, keeping the blue balls away from your party is crucial because they make you do 10% of your normal damage and dying to brand makes the run hell for everyone else. Lucid- Absolute minimum requirements are probably 21k stat, level 230 and 540 AF. Although most people will want 22-24k stat minimum, level 235 and 540 AF. Good communication is key here, try be on voice comms with your party, so people can call dragons/when to cleanse butterflies/when to clear golems/binds etc. Being in a discord channel or smth similar makes the run so much easier. I also cannot stress enough the importance of a support class. I run it with a kanna, and it makes my life so much easier and my damage so much higher. Same applies to a bishop- they are more valuable than a sixth DPS member. Legion [1031] Legion is the old character card system- it's pretty much a reward system for making mules. Once you get a cumulative server level of 600, you'll unlock the legion grid, which is pretty much free stats for having mules. You then play Tetris with your character blocks to place them onto the grid onto the sections that give the stats that you want. You start with just the Inner Grid, which gives you access to HP,MP,STR,LUK,DEX,INT,ATT,M,ATT. When you get to 2000 legion, you unlock the first part of the outer grids, which give Boss Damage, IED, Crit Damage, Crit Rate, Buff Duration, EXP, Knockback Resistance and Abnormal Status Resistance. Every 500 levels after that you unlock the next outer part of the grid. Each character that you place on the grid will grant a bonus effect - the list can be seen here ordered by priority that you should take them for damage. Credit to /u/MsNyara. Additionally, each character also acts as an 'attacker' on the legion dragon. Every x amount of damage done to the legion dragon will give you one legion coin. This 'raid' continues whenever you are online, you don't need to actively do it. You can use these coins to upgrade your legion and buy various buffs and items from the legion store, important stuff like 50% Epic Potential Scrolls and Wealth buffs that increase your mesos gained by 50% (very helpful for Kanna meso farmers). The damage done by your other mules on the legion grid is determined by their level of starforce and character level. Stupid Endgame Optimisation/for the really dedicated [1032] If you're going for bk legion and want faster grinding and have a 3rd access to maple (laptops/craptops) it'll be beneficial to make a lv170 Bishop Mule for Holy Symbol. Get it to 170 so you can also use it as heaven's door mule for lucid/lotus/damien runs. If you're going for an arcane weapon/set, you might want to make a farmer for dedicated farmer character for more efficient rates, I'll list a couple here: Kanna- Best farmer as of now. Great map control with Yaksha boss, kishin boosted with nodes, domain, tengu strike, nimbus curse, high damage lucid soul- easy to get into lucid/high tier rates, should be around 500-600m per hr when funded enough. Luminous- Cheapest farmer, with 17k stat + 540 AF you can comfortably farm all arcana maps and make 670-720m/hour with 120% meso obtained at Lab Cavern Upper/Side Path. Not recommended if you have high ping, as an australian player myself Lumi's are heavily gated by ping, I was making 580-600m/hour instead of higher than that because of the tp delay With the Kishin nerf, lumi is now a mid-tier farmer as it is harder to maintain 100% door uptime due to lowered spawn rate and makes around 500m per hr. If you main any of the following classes or the classes listed above and dislike the thought of funding a farmer you can just grind on them because the rates they make are good enough to compete with farmers, although some of them require heavy funding to hit certain breakpoints that enable them to farm efficiently. Blaze Wizard (22-23k to 1hko orbital flame) Ice Lightning (2 tick Ice Age) Angelic Buster (3/2/1 tick soul seeker) Kaiser (2hko dragon breath) Beast Tamer (2hko? (not sure) majestic trumpets) Shadower (1hko dark flare) Night Lord (1hko mark) Night Walker (1hko bat) Cannoneer (2hko summons) Corsair (1/2hko summons (not sure this one)) Secondary Weapons [1033] If you're deadset on getting everything maxed, go for Princess No or Maple Treasure but honestly you're only losing a few wep atk so it's absolutely fine to cube your normal secondary to 3L ATT. Cheat Sheet [1033] Obtaining Mesos: The best way is to make a kanna for meso farming, more details can be found in the 'meso farming' section. In essence you abuse kishin and kanna's AOE damage aura to auto-farm mesos with little effort or use her excellent mobbing to actively farm and make mesos at Singapore. The other option is to solo run all your daily bosses, such as Zak, HT, Pink Bean, Root Abyss and sell the boss crystals for mesos. You can also run Ursus everyday for ~50m mesos. Increasing your range: The best way to easily increase damage is by making Link Skill mules. Link skills such as Demon Avenger, Kanna (both give 10% damage at lv120), Ark (11% dmg in combat) and lllum (11% dmg while moving), as well as Hayato (+25 all stat and +15 w/m.atk at lv120) and others are really easy ways to increase range. You can also do the Will of the Alliance quest to get 5 m/w.atk and some all stat. Best way is to meso farm and cube/starforce BIS gear. Kishin: It's a super broken kanna skill that increases the maximum number of mobs on the map and increases spawn rate. It makes levelling and node farming much easier. This is why many players make a second account and use a spare laptop to kishin themselves while levelling mules or themselves. Legion: It's the old character card system, essentially you get bonus stats for having a lot of characters. Players generally leave this till last because levelling 40 level 200 characters takes a long, long time to get 8000 legion which is what it maxes out at. It also gives some small benefits like exp/meso buffs, potential scrolls and cubes. Gear Progression: Simply, your gear progression starts at lv140 with Pensalir gear and your boss set accessories from Zakum/Horntail and Magnus. After that you progress to CRA gear + Gollux accessories along with Tyrant cape/boots. Then you'll slowly move to AbsoLab Gear, Superior Gollux Accessories, SW face/eye and 17/22* rings. After that you can get your Arcane Umbra weapon/gear but not many people have time for that. Everything explained here can be read in the main guide in much more detail, using the codes in the contents. Credit [1034] Gear Progression- My own experience/ 0 credit to /u/jumesuke My guild, Oceania /u/Oceania. Reboot, who taught me a lot of this stuff Legion table /u/MsNyara Bossing Range recommendations: by /u/Ekanseltar Potential Tiers by Level - 25* Progression Guide - /u/CodeUmbra IA/Link Skills Guide - /u/CodeUmbra Professions Guide - /u/MrTaism Bossing Guides - /u/zergjuno Alternate Progression Guides - /u/StompUrRofl and /u/julettSierraFoxtrof. If I've missed any sections or there is anything you'd like me to add to the guide, please comment below and let me know. I made this to hopefully stop the flood of "Returning player pls help!" posts that always seem to flood the subreddit. Any criticism/errors will be welcome, There are probably errors here and there! If I've linked your material and you'd like it to be taken down please contact me and I'll remove it ASAP. Thanks for reading. Last update: 8/26/2019 by pocket
